

EENS

Optimize E-Prime
experiment
communication with
EGI EEG systems

E-Prime
Extensions for
Net Station

Features:

- Maintain time synchronization between E-Prime and Net Station
- EGI experiment control interface (ECI) available to integrate with other experiment control systems
- Net Station toolbox of package calls in E-Studio
- Drag and drop package calls give the ability to:
 - Start and stop your EEG recording
 - Load, start, and stop pulse trains
 - Send markers based on onset of objects and trial condition for simpler data analysis

Includes:

- User manual with experiment tutorial
- Samples and Tutorials
- All Package Calls needed for seamless integration
- E-Prime support and EGI support

Requirements:

- E-Prime 3.0
- EGI Net Station software
