

# -Prime CHALLENGE 2019

---

Submit your most innovative E-Prime 3.0 experiment for a chance to win our 2nd annual E-Prime Challenge.

Our team of judges will review each experiment to select the winner based on the following categories:

- Is the experiment an innovative use of E-Prime?
- Does the experiment make the best use of available features to accomplish their design?
- Has the submitter employed E-Prime best practices in their experiment?
- Is the data output of the experiment sufficient to analyze the hypothesis in the experiment description?

Take a look at the 2018 submissions in our [E-Prime 3.0 Experiment Library](#).

---

We will announce the winner at Psychonomics 2019 (November 14-17) in Montreal. **The winner will receive an E-Prime 3.0 Single User License, a Chronos, and an E-Prime Challenge t-shirt.**

**Check out our judges!**

Anthony Zuccolotto

Original E-Prime Developer, Current President and CEO of PST

Brandon Cernicky

Lead E-Prime Developer, Software Engineering Manager of PST

David McFarlane

Systems Designer at Michigan State University, Famous Google Group Contributor

Michiel Spape

Senior Researcher at University of Helsinki, Co-Author of *The E-Primer*, Popular Google Group Contributor

---

### Important Dates and Details

- Submissions are due by 5:00 PM EDT (UTC -4) October 25, 2019
- Submit your zipped experiment and resource files [here](#)
- Winner will be announced November 14, 2019 at Psychonomics (winner does not need to be present)
- The winning experiment will be shown at Psychonomics and will be noted in our Experiment Library
- A subset of the submissions chosen by our judges will be shared in our Experiment Library (credit will be given to the authors)

---

### Rules

- The experiment must use E-Prime 3.0. If you don't have it, use the [demo](#).
- The experiment must be authored by the submitter
- The submission of the experiment implies consent that the experiment can be shared in our Experiment Library if chosen by our judges
- Each submitter is limited to one submission

- If the experiment is designed to communicate with an external device, a sample data file must be included in the submission to confirm the experiment functions as designed
